

Appl. No. : 09/965,786
Filed : September 27, 2001

IN THE CLAIMS:

1. (currently amended)

An information system associated with a gaming system including at least one gaming device, the gaming device arranged to present at least one game for play thereon, comprising:

a player tracking device associated with said gaming device, said player tracking device including a card reader, a keypad, at least one speaker and at least one display;

a player tracking host arranged to store data regarding one or more players of said gaming device;

[a communications link between said player tracking device and said player tracking host over which information is transmitted;]

an information system host, said information system host arranged to determine the eligibility of a player of said gaming device to multi-media information, said eligibility determined from said data regarding said player, and said information system host arranged to generate multi-media information for presentation by said player tracking device of said gaming device based upon said eligibility, said multi-media information comprising video or one or more images for presentation upon said at least one display of said player tracking device and audio information for presentation by said at least one speaker of said player tracking device; and

a communication link between said player tracking device and said player tracking host over which said generated information is transmitted.

Appl. No. : 09/965,786
Filed : September 27, 2001

2. (original)

The information system in accordance with Claim 1 wherein said information host is arranged to determine said eligibility in response to an indication from said player tracking host that a player has begun playing said gaming device.

3. (original)

184 The information system in accordance with Claim 1 wherein said communications link comprises a portion of a communication network.

4. (currently amended)

The information system in accordance with Claim 3 wherein a plurality of player tracking devices associated with differing gaming devices are associated with said player tracking host.

5. (currently amended)

The information system in accordance with Claim 1 wherein said information host [system] is adapted to generate information regarding a player promotion.

6. (canceled)

Appl. No. : 09/965,786
Filed : September 27, 2001

7. (original)

The information system in accordance with Claim 1 including a top box mounted upon a housing of said gaming device, said top box supporting at least a portion of said player tracking device.

8. (currently amended)

A method of providing information to a player of a gaming machine comprising:

providing a player tracking device associated with said gaming machine, said player tracking device including a player tracking device controller and at least one peripheral, said at least one peripheral selected from the group consisting of a card reader, display, printer, keyboard and speaker, a player tracking host located remote from said player tracking device, and a player tracking network including one or more communications links permitting transmission of information to and from said player tracking device and player tracking host, and an information host associated with said network;

determining the eligibility of a player of said gaming machine to multi-media [certain] information, said multi-media information comprising image or video information and audio information;

generating said multi-media information;

transmitting said multi-media information from said information host to said player tracking device over said player tracking network; and

Appl. No. : 09/965,786
Filed : September 27, 2001

presenting said multi-media information to said player at said gaming machine with said player tracking device, including presenting said image or video information to said player with said display and presenting said audio information to said player with said speaker.

9. (original)

The method in accordance with Claim 8 wherein said step of determining the eligibility of said player occurs in response to an indication of a player playing said gaming machine.

AY 10. (original)

The method in accordance with Claim 9 wherein said indication comprises the transmission of player identification information from said player tracking device to said player tracking host.

11. (original)

The method in accordance with Claim 8 wherein said step of presenting information comprises displaying information to said player on said display of said player tracking device.

12. (canceled)

13. (currently amended)

The method in accordance with Claim 8 wherein said multi-media information comprises promotion information.

Appl. No. : 09/965,786
Filed : September 27, 2001

14. (original)

The method in accordance with Claim 8 wherein said step of determining player eligibility comprises determining if said player has accrued a number of reward points.

15. (currently mended)

The method in accordance with Claim 8 wherein said step of determining player eligibility comprises determining if said player is playing [player] a certain type of gaming device.

16. (currently amended)

The method in accordance with Claim 8 wherein said multi-media information comprises information regarding a bonus.

Claims 17-18 (canceled)

19. (currently amended)

A method of providing information utilizing a player tracking device of a gaming machine comprising:

providing a player tracking device associated with said gaming machine, said player tracking device including a player tracking device controller and at least one peripheral, said at least one peripheral selected from the group consisting of a card reader, display, printer, keyboard and speaker, a player tracking host located remote from said player tracking device, and a player tracking network

Appl. No. : 09/965,786
Filed : September 27, 2001

including one or more communication[s] links permitting transmission of information to and from said player tracking device and player tracking host, and a player tracking host associated with said network;

transmitting multi-media information to said player tracking device over said one or more communication links;

storing said multi-media information at said player tracking device;

periodically accessing stored multimedia information located at said player tracking device;

and

presenting said multimedia information at said gaming machine with said player tracking device independent of player activity.

20. (canceled)
